SUMMARY

Lead Frontend Engineer with 17+ years of experience leading frontend architecture, enterprise modernization and engineering teams across AI-powered CMS products. Improved frontend performance by 65%, built reusable architecture adopted across 11 applications, and accelerated development through AI-powered tooling. Focused on building scalable frontend platforms that improve product delivery and engineering efficiency.

SKILLS

- **Frontend:** React 18/19, TypeScript, JavaScript, Angular
- **Architecture:** Micro-frontends, Design Systems, Shared UI Libraries, Component Architecture
- **State & APIs:** TanStack Query, React Context, REST, GraphQL
- **Testing:** Jest, React Testing Library, Jasmine, Karma
- **Tooling:** Vite, Webpack, GitHub Actions, GitLab CI/CD, Docker
- **AI:** Claude, Cursor, GitHub Copilot, LLM Integration, Prompt Engineering

EXPERIENCE

Frontend Lead | Sitecore (Mar 2022 - Sep 2025) / TEAM International (Sep 2025 - Present)

Product: Sitecore AI - an AI-powered enterprise CMS and digital experience platform within Sitecore XM Cloud, used by enterprise organizations to create, manage, and deliver digital experiences across sites and channels.

- Led end-to-end frontend delivery across 3 AI product modules, shipping new capabilities across AI-assisted component development, site management, and content authoring experiences.
- Partnered with Product, UX, Backend, and QA throughout feature development, identifying frontend constraints and refining requirements before implementation to reduce rework and improve delivery readiness.
- Migrated iframe-based micro-frontends to Module Federation and leveraged data prefetching with TanStack Router, reducing cold-start page load time by 65% (from 8.0s to 2.8s) enabling users to access the application faster.
- Built an AI-powered assistant that enables developers to generate production-ready Sitecore SXA components from natural-language prompts in under 5 minutes, replacing a process that previously took hours.
- Developed real-time component visualization and AI-driven variant generation capabilities, enabling users to experiment with UI components, styling, layouts, and data inputs without modifying live pages and accelerating design iteration.
- Established and maintained 85%+ test coverage using Jest, React Testing Library, Jasmine, and Karma, reducing regressions and improving release stability.
- Mentored 10+ mid-level engineers and established frontend engineering best practices, enabling greater team autonomy and consistent architecture, code quality, and delivery standards across the CMS platform.

Senior Frontend Engineer | Sitecore, November 2018 - March 2022

Product: Sitecore Experience Platform - enterprise CMS with modern content authoring and management capabilities, powering millions of digital experiences daily for global enterprise brands.

- Modernized the legacy frontend of ExM, delivering a zero-downtime migration to Angular for an enterprise email marketing platform built for 1M+ emails per week, creating a scalable foundation for future product development.
- Introduced a contract-driven Node.js mock server that enabled frontend development to stay 2-3 sprints ahead of backend delivery, reducing dependency-related waiting time.
- Introduced Storybook for isolated UI component development and testing, enabling parallel QA validation and frontend development before product integration, reducing feedback cycles and accelerating feature delivery.
- Optimized Angular bundle composition and lazy loading, reducing initial load time by 21% and improving Core Web Vitals.
- Applied a micro-frontend architecture for Sitecore Horizon Content and implemented RPC-based communication between independently developed modules, enabling separate product areas to be developed independently and integrated into a unified content authoring experience.

Frontend Engineer | Sitecore, January 2012 - November 2018

Product: Sitecore Experience Platform - enterprise digital experience platform with analytics, customer profiling, personalization, and marketing automation capabilities.

- Built a shared design system adopted across 11 applications, improving UI consistency and reducing duplicated development effort.
- Delivered complex Angular and TypeScript features for enterprise CMS products, collaborating with UX designers and backend engineers to build scalable, production-ready functionality.

Earlier Frontend Experience | September 2009 - January 2012

Developed responsive, cross-browser websites from UI designs using HTML, CSS, and JavaScript, delivering pixel-perfect implementations for client projects.

EDUCATION

Bachelor's Degree in Metal-Cutting Machines and Systems, Oles Honchar Dnipro National University, 2004 - 2009

Computer graphics and Internet technologies, IT STEP Academy, 2003 - 2005

CERTIFICATES & COURSES

- Building with the Claude API, Anthropic, 2026
- Practical GitHub Actions, LinkedIn, 2026
- Docker for the Absolute Beginner, Udemy, 2024
- React: Software Architecture, LinkedIn, 2023
- React: Design Patterns, LinkedIn, 2021

LANGUAGES

English - Professional Working Proficiency
